

The Copper Scroll Decoded: One Mans Search for the Fabulous Treasure of Ancient Egypt

In his research of the Copper Scroll, Robert Feather has made two interlinked discoveries: firstly the location of the treasure that is referred to in the Scroll, not only the silver, gold and jewellery that is already in museums but also the exact sites at which the remaining items lie buried. This news will cause excitement amongst archaeologists throughout the world. In 1959 & 1960 John Allegro of Manchester University led unsuccessful trips to find the treasure. His translation of the Scroll had been based on some misconceptions that Robert Feather has now been able to identify. Secondly, the accumulation of new research to back the old but neglected theory that the origins of the worlds three great monotheistic religions can all be traced to Ancient Egypt and in particular to the Pharaoh Akhenaten. The author will show why it makes such sense that Moses was in fact an Egyptian and answer many other historical anomalies and puzzles.
