

This book presents a new view on man and on life as well as a distance healing therapy (NPL healing, New Personality and Life healing) and a free self-help healing technique (NPL self-treatment). These techniques can profoundly change people and their lives for the better by impacting on the subconscious mind. The theory advanced by the author holds that the personality and life of people are determined by the subconscious mind. This subconscious mind is present around the soul that incarnates in a body, in the form of programmes or patterns (negative) and energies (positive). The patterns are responsible for difficulties we have in life regarding personality, talents, health, circumstances and occurrences in life. Every pattern has a certain contents, for example 'you feel inferior' or 'there is no love in your life', or 'you think slowly', etc. Every energy holds a certain quality that is manifested in the person around whom it is present. When someone is honest, has affluence, is intelligent, is healthy and loving, then these characteristics are the result of energies surrounding him holding these qualities. The author is able to perceive the subconscious mind around people and to destroy the patterns as a result of which the negative characteristics they caused will cease to exist. In this process, underlying energies are released. NPL healing is a powerful way for improving personality and life, and it is also a path to spiritual enlightenment, since it can liberate the soul/person from the negative programmes in the subconscious mind and restore the soul to its original enlightened state.
