

Where Dolphins Go

SHE WAS A MOTHER LOOKING FOR A MIRACLE... Susan Rileys last hope for her little boy with the rare heart condition was at Oceanfront Research Center. If she could only convince the head of the center to let her son interact with the dolphins, she might just find the miracle shed prayed for. She never expected to find a haunted former heart surgeon there...and she certainly hadnt counted on falling for him. Can she help her son and still resist the man who is already spoken for? HE WAS A DOCTOR LOOKING TO FORGET... Dr. Paul Tyler hadnt been able to save his own son. He had no intention of getting involved with a desperate mother and a four-year-old who reminded him of all hed lost. But how could he ignore the beautiful woman who wouldnt give up? The possibility that he might be Jeffys one chance to live? Does Paul dare pick up the scalpel again? Does he dare let himself love a brave mother and a little boy he might lose?

What do dolphins do during storms? Discover Wildlife How do dolphins sleep? Dolphins have to be conscious to breathe.[1] This means that they cannot go into a full deep sleep, because then they would suffocate.
