

Moonlighting

Pride and Prejudice variation. Forced to flee France, in the 12th century, to preserve their community, the werewolves moved to less populated England. Fitzwilliam Darcy lived at Pemberley in the far northern parts of England. He inherited his leadership of the Pemberley pack from his late father. His human mother had passed long before her mate. In an effort to dilute the bloodlines to better control the change the males sought human wives. Darcys love of Elizabeth Bennet was complete and for life. Bound by the law of the pack to withhold his true identity until his wife was with child, Darcy married Elizabeth Bennet at the same time as his best friend Charles Bingley married her sister, Jane. Now in the far reaches of Pemberley, will Lizzy learn her husbands secret? Will she escape this unnatural community or, will their love prevail against overwhelming odds? What will her life be as the Alpha Female of the werewolves of Pemberley?
