The Billionaires Wife is a full standalone BWWM Romance Novel with a happy-ever-after and NO CLIFFHANGER!

What began as a marriage of convenience becomes much more...and what erupts defies imagination! Kiona Walker is a force of nature. Exceptionally skilled at totally reinventing herself, reading people, and bluffing her way through careers, she is a corporate spy on the search for her big break. Her charm and flexibility mask a past filled with hardship and anguish, and her brash impulsiveness won't work forever. But love was the one curveball she could never prepare for. Cole Andrews is as blindingly rich as he is untouchable. Deceptively savvy. Incredibly withdrawn. One final obstacle puts his empire on the line. He's going to need the perfect partner. Someone who can play the game. But deceit and danger surrounds him, and beneath his calm, collected persona lies a painful secret that will push their blossoming romance to the very limit. Caring for her was never part of the plan...but can he finally trust someone else? It was supposed to be simple, but every punishing twist and turn and every last truth revealed only tested our unlikely bond.
