

The Alphas She-Wolf

This is a second edition, it has been revised and edited. Sexy dreams have disturbed Shauna for months now and they are always the same. A man with his arms around her that she cant see, leads to sensual experiences that keep her from sleep. Shes tired of waiting for him to show up in person and shes exhausted from his nightly visits. When he finally does, its not how she expected and she is more than a little disappointed in his tactics. Connor has finally found her, his mate, and she is nothing like she was in his dreams, only her scent is the same. It should be easy, this mating, but shes proving to be more of a challenge than he anticipated. Can they find their way to each other? Or will their expectations, and surprising discovery, destroy what nature intended?
