Now that she's finally there, however, something is missing. But when an unexpected snowstorm forces her to shelter in a tiny shepherd's hut in the mountains, Meg knows that that "something" is not the beautiful jerk who just beat her to the hut's only bunk. Reeling from his mother's death and overwhelmed by expectations that he'll take over her business, Nick lets friends talk him into a tour of the South Pacific. When their idea of a perfect vacation turns out to be drunk nights and bleary mornings, with forgettable hookups in between, Nick escapes to a quiet place where he can handle the grief his own way. And it might have worked if a freak storm hadn't brought with it a prickly know-it-all who hated him on sight. A novella (approx 21,000 words) featuring a woman who depends on no one but herself, a man who isn't ready to get close to anyone, and a blizzard that will change everything. **STRANDED Series Locked in a kinky archive.** Snowbound in a primitive mountain hut.
