

The Lakshmi Series: Thirty Talks on MP3

The first talks that Rama - Dr. Frederick Lenz recorded in 1982 and 1983 are now available in MP3 format. Thirty talks in the LAKSHMI series are now on two CDs! These talks were originally recorded onto tapes that most sound equipment today does not support. After hunting for a way to do the conversions, our sound engineers were able to convert them to high quality digital sound. The original talks were recorded in private and public settings and cover a vast range of topics that Rama once called the basics that everyone should know. The talks cover topics ranging from living and working in the world to the four principal yogas to the Buddhist paramitas of purity, humility and working for the welfare of others to dreaming and American mysticism... and much more.
